## Introduction

---

Welcome to enjoy the fantastic sightseeing world. This new technology will bring you the whole new feeling about the "monitor". We show here some of the major advantages of the LCD monitor. You will really find some other advantages when you use it.

## Hardware Installation

---

This chapter will guide you the correct installation procedures of your LCD monitor.

### Unpacking

After you unpack your LCD Monitor, please make sure that the following items are included in the carton and in good condition. If you find that any of these items are damaged or missing, please contact your dealer immediately.

- One LCD Monitor
- 15-pin D-sub Video cable (Option)
- AC/DC adapter with 12V DC output (Option)
- AC power cord (Option)
- Quick installation Guide

### Installation

This analog LCD display **does not** require any special drivers. Necessary drivers are supplied by the video card manufacturer and may be found on the diskettes supplied with the video card that came with your computer. Windows 98/2000/XP drivers for both the display and the video card are supplied on the Windows 98/2000/XP CD or diskettes. Unfortunately, Microsoft did not provide a complete listing of the displays on the initial retail release. You may use the standard XGA (1024x768) as the display type. The video card must also be set up correctly in Windows 98/2000/XP and make sure the video output of the VGA card is on list in Section 6.1 or check your Video Card manual or Windows 98/2000/XP Read me file for further information on Video Card. After the question listed above is solved, we continue the setup procedure as below.

1. Turn power off both Computer and Display before making any connection.
2. Install Display on the solid horizontal surface such as a table or desk.
3. Connect the power cable and the AC/DC adapter, then connect adapter toe the back of the LCD monitor.
4. The LCD monitor comes with a 15-pin video cable; you may use this cable for both IBM PC's & compatibles and Macintosh.
5. Tighten the screws of the Display cable until the connectors are fastened securely.
6. Switch on power to the Computer system, then to the monitor.

The following picture provides the connection outline

Option: S-video input  
 AV input  
 VR  
 Lightsensor  
 BNC

### Video Input Pin Assignment

This section describes the pin assignment of the LCD's video connector. It is called 15pin Mini D-sub connector.

Pin No.	Signal Connector
1	Red Video Signal
2	Green Video Signal
3	Blue Video Signal
4	N.C.
5	Ground
6	Ground for red video signal
7	Ground for green video signal
8	Ground for blue video signal
9	N.C.
10	Ground
11	N.C.
12	DDC data
13	Horizontal sync signal
14	Vertical sync signal
15	DDC clock

## The Display Timing

---

### Applicable video timing

The following table lists the better display quality modes that the LCD monitor provides. If the other video modes are input, the monitor will stop working or display unsatisfactory picture quality.

VESA Modes					
Mode	Resolution	Total	Nominal Frequency ±0.5KHz	Nominal Frequency ±0.5KHz	Nominal Pixel Clock (MHz)
DOS	720x400@70Hz	900x449	31.469	70.087	28.322
VGA	640x480@60Hz	800x525	31.469	59.940	25.175
	640x480@72Hz	832x520	37.861	72.809	31.500
	640x480@75Hz	840x500	37.500	75.000	31.500
SVGA	800x600@56Hz	1024x625	35.156	56.250	36.000
	800x600@60Hz	1056x628	37.879	60.017	40.000
	800x600@72Hz	1040x666	48.077	72.188	50.000
	800x600@75Hz	1056x625	46.875	75.000	49.500
XGA	1024x768@60Hz	1344x804	48.363	60.004	65.000
	1024x768@70Hz	1328x806	56.476	70.069	75.000
	1024x768@75Hz	1312x800	60.023	75.029	78.750
IBM Modes					
EGA	640x350@70Hz	800x449	31.469	70.086	25.175
DOS	720x400@70Hz	900x449	31.469	70.087	28.322
VGA	640x480@60Hz	800x525	31.469	75.000	31.500
XGA	1024x768@72Hz	1304x798	57.515	72.100	75.000
MAC Modes					
VGA	640x480@60Hz	800x525	31.469	59.940	25.175
SVGA	832x624@75Hz	1152x667	49.725	74.551	57.2832
XGA	1024x768@75Hz	1328x804	60.927	74.927	80.000

## The Display Controls

---

### Membrane Control Button

❶ **POWER SWITCH:** Pushing the power switch will turn the monitor on. Pushing it again to turn the monitor off.

❷ **Power LED:** Power ON-Green / Power off-No.

❸ **Up Key >:** Increase item number or value of the selected item.

❹ **Menu Key:** Enter to the OSD adjustment menu. It also used for go back to previous menu for sub-menu, and the change data don't save to memory.

❺ **Down Key <:** Decrease item number or item value when OSD is on. When OSD is off, it is hot key for input switch between VGA, AV, and S-video.

### Screen Adjustment Operation Procedure

- 1. Entering the screen adjustment**

The setting switches are normally at stand-by. Push the **Menu Key** once to display the main menu of the screen adjustment. The adjustable items will be displayed in the main menu.
- 2. Entering the settings**

Use the **Down Key <** and **Up Key >** buttons to select the desired setting icon and push the SELECT button to enter sub-menu.
- 3. Change the settings**

After the sub-menu appears, use the **Down Key <** and **Up Key >** buttons to change the setting values.
- 4. Save**

After finishing the adjustment, push the SELECT button to memorize the setting.
- 5. Return & Exit the main menu**

Exit the screen adjustment; push the "MENU" button. When no operation is done around 30 sec (default OSD timeout), it goes back to the stand-by mode and no more switching is accepted except MENU to restart the setting.

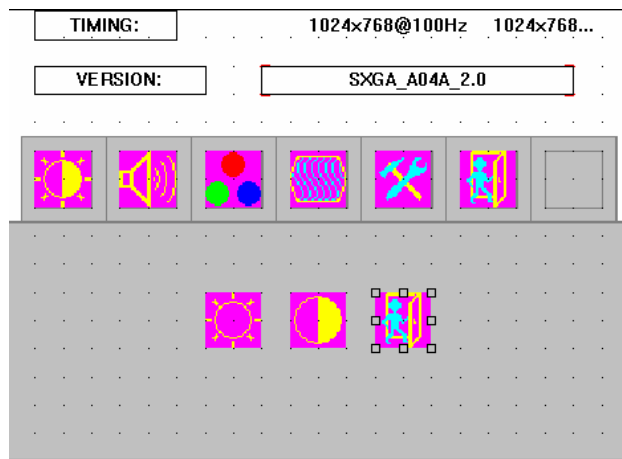

## The Screen Adjustment

---

### OSD menu

Here are some instructions for you to use the OSD (On Screen Display).

By pressing the “menu”, you will see the below picture. Timing shows resolution, H-frequency, and V-frequency of the panel. Version shows the firmware control version. This 2 information is not changeable by user.

There are 6 sub pages inside the OSD manual, Brightness, Sound, Color, Image, Tools, and Exit.

When you press “menu” button, you enter the “Brightness” sub page. You will see 3 selections:

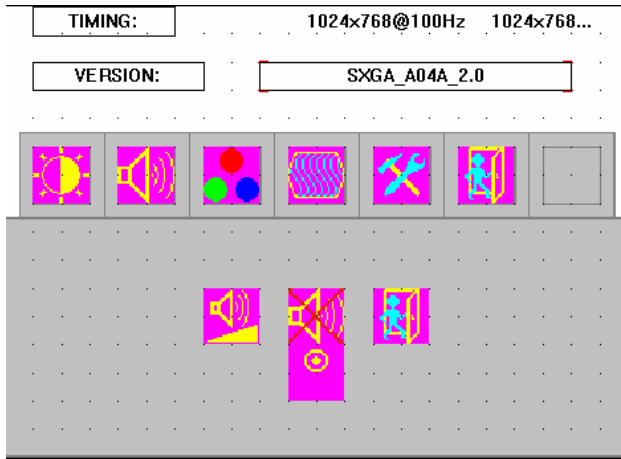

**Brightness:** Press “menu” once, you can go into adjust the brightness. Press “left” you can dim down the brightness to “0”, while press “right” you can increase the brightness to “100”.

**Contrast:** Press “menu” and “right” you can adjust the contrast from “0” to “100” by pressing the “left” and “right”.

**Exit:** You can exit this sub menu back to normal screen.

There are 3 options for “Sound” sub page.

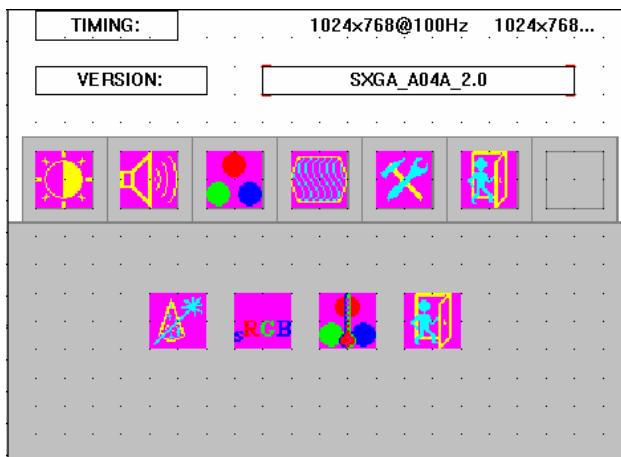

**AudioVolume:** Audio volume adjustment.

**Mute:** You can mute the speaker by pressing this option.

**Exit:** back to the normal screen.

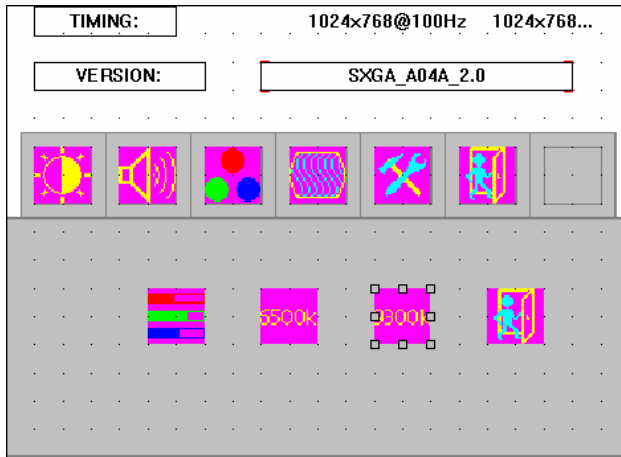

Pressing the ‘menu’ and “right”, you can go to “Color” sub page.

**AutoColor:** by press this “Auto Color” option, you can get the optimal color performance.

**sRGB:** Windows standard color setting.

**ColorTemp:** You can have 3 options in this selection.

**ColorTemp\_User**

**ColorTemp\_6500K**

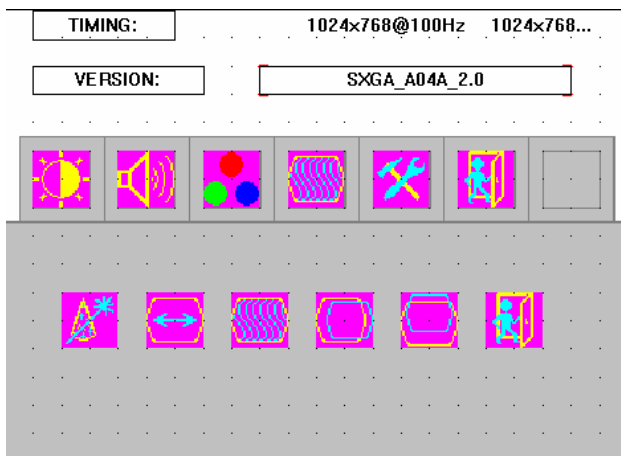

**ColorTemp\_9300K**

“user mode”, “6500K” (Warm color scheme), “9300K (Cold color scheme). Default is “user”, and inside all “R”, “G”, and “B” are set “100”

**Exit:** back to the normal screen.

Go into the “Image” page, you can see below picture.

**Autojust:** Pressing this option, the AD5621 will adjust the optimal frequency of horizontal and vertical. You will see “Autotune...” On the screen for around 3 seconds.

**Clock:** If you are not satisfied about the Autotune result, you can adjust manually by “Clock”. The screen will be “wider” if you adjust this function.

**Phase:** If you see “double image” on characters, you can adjust “Phase” to make it perfect image.

**HPos:** You can shift the screen horizontally by this function.

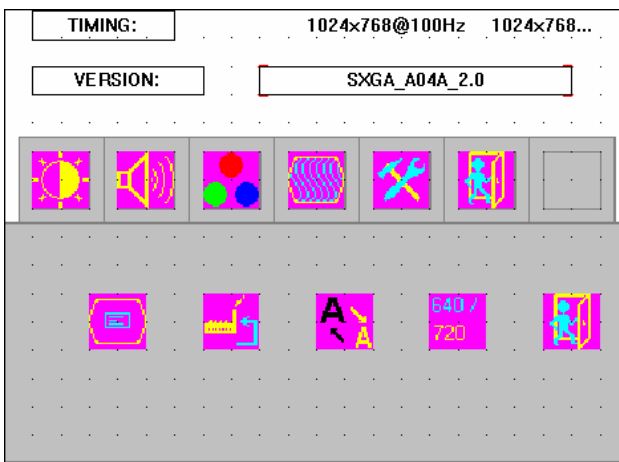

**Vpos:** You can shift the screen vertically by this function.

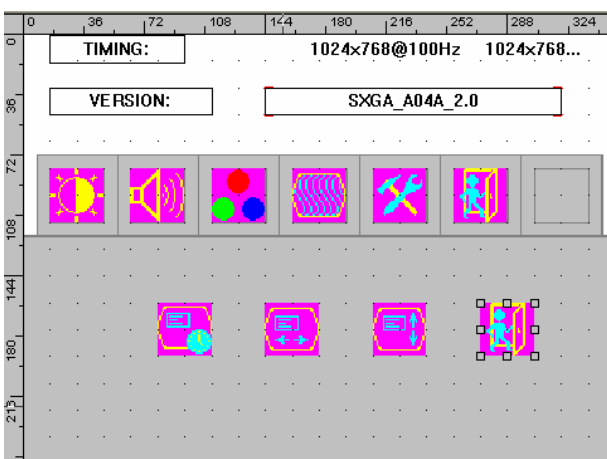

**Exit:** Back to normal screen.

On the “Tools” sub menu, you will see 5 icons.

**Osd Control:** Select this option, you will see 4 more options:

**Osd\_time:** You can selection the time of OSD from 2 sec. to 16 sec. Default is 6 sec.

**Osd\_HPos:** You can move the OSD horizontally over the screen.

**Osd\_VPos:** You can move the OSD Vertically over the screen.

**Exit:** back to main menu.

**Factory\_Reset:** By pressing this, the screen will be back to the factory setting on very beginning and lost all the personal settings.

**Sharpness:** You can make the characters looks sharper.

**Dos\_mode/Gxf\_mode:** Some old programs running over 640x400 and 720x400 (DOS Mode and graphics mode), you need to select this option manually.

**Exit**

OSD Lock Function: You can lock all the OSD buttons to prevent unauthorized change by pressing “Menu” and “right >” 2 buttons simultaneously. You will see below “lock” on center of the screen for 3 sec. If you push any button (include power) later, you will see this lock icon on the screen.

You can press the “Menu” and “Right >” again to release the OSD lock. You should see the below unlock icon on the center of the screen for 3 sec. Now all the OSD keys are active again.

Factory Burn-in mode: While your VGA cable is connected on the monitor, press "Menu" and Left <" simultaneously, you will see "BURN IN MODE" on the center of the screen for 3 sec. Then unplug the VGA cable, the screen will show Red, Green, Blue, White, and Black in sequence automatically.

You can plug in the VGA signal cable, and re-plug the power connector to exit the burn-in mode.

## Specification

---

Model No.	LD1236
Display Area	245.76 (H) x 184.32 (V) mm
LCD Display	12.1" TFT active matrix
Display Colors	262,144 colors
Luminance	1250 cd/m <sup>2</sup> (typ.)
Contrast Ratio	500:1 (typ.)
Resolution	1024 x 768 (XGA)
Pixel Arrangement	RGB (Red, Green, Blue) vertical stripe
Pixel Pitch	0.24 (H) x 0.24 (V) mm
Viewing Angle	At the contrast ratio 10:1 . Horizontal: Left side 70° (typ.), Right side 70° (typ.) . Vertical: Up side 55° (typ.), Down side 70° (typ.)
Color Gamut	At LCD panel center 60% (typ.) [against NTSC color space] Ton (black 10%→white 90%)
Response Time	50 ms (Max)
Sync	LVDS
Signal Connector	15 Pin D-sub
F/R Control Button	Power Switch, Menu, Select (+,-), Auto
OSD Menu	Brightness, Contrast, H/V Position, Color, Phase, Clock, Language, Management
Power Consumption	At maximum luminance and checkered flag pattern 22W (typ.)
Module Size	338(H) x 278 (V) x 59.3 (D) mm
Weight (Net)	3.07kg (typ.)

## **Product Safety Precautions**

---

Follow all warnings and instructions marked on the product.

Do not use this product near water.

This display should be installed on a solid horizontal base.

When cleaning, use only a neutral detergent cleaner with a soft damp cloth.

Do not spray with liquid or aerosol cleaners.

Do not expose this display to direct sunlight or heat. Hot air may cause damage to the cabinet and other parts.

Adequate ventilation must be maintained to ensure reliable and continued operation and to protect the display from overheating. Do not block ventilation slots and openings with objects or install the display in a place where ventilation may be hindered.

This display should be operated from the type of power source indicated on the AC/DC adapter.

Do not install this display near a motor or transformer where strong magnetism is generated. Images on the display will become distorted and the color irregular.

Do not allow metal pieces or objects of any kind fall into the display from ventilation holes.

Do not attempt to service this unit yourself. Removal of the display cover may expose you to dangerous voltage or other risks. Refer all servicing to qualified service personnel.

Unplug this product from the wall outlet and refer servicing to qualified service personnel in the event that:

1. Liquid is spilled into the product or the product is exposed to rain or water.
2. The product does not operate normally when the operating instructions are followed.
3. The product has been dropped or the cabinet has been damaged.
4. The product exhibits a distinct change in performance, indicating a need for service.
5. Power cord or plug is damaged or frayed.
